## Work & Experience

---

### Cycle Technology *Software Engineer Intern*

Jan 2021- Present

- Use Wordpress plugins to update the core website to match a new Adobe XD design.
- Work remotely with the core technology team effectively to meet project deadlines.
- Learn Swift and work with the design team to push new app features to the App Store.

### Tech Elevator *Business Development Intern*

May - Aug 2019

- Utilized Zoho, Sales Navigator, & Google Suite to connect potential hiring companies in new and existing markets with graduating Java & .NET developers.
- Worked closely with the Talent Acquisition Manager to find specific, top-talent for a rapidly growing company. Communicated remotely with co-workers from the Columbus, Cleveland, Cincinnati, and Pittsburgh campuses to help achieve location-specific project goals.
- Created surface-level CBAs for potential re-skilling programs worldwide (India, Argentina).
- Discovered and reached out to over 30 new hiring partners (ranging from startups to large-cap) to develop career opportunities for graduating students at the newly opened Detroit Campus.

### Ohio State Student Life *Sustainability Programming Lead*

Aug 2018 - May 2020

- Responsible for in-person and digital sustainability communication to students through mediums such as peer-to-peer tabling discussions, social media campaigns, mentorship groups, and presentations.
- Utilize sustainability metrics to track progress towards university-wide 2025 sustainability goals
- Consistently build Twitter, Facebook, and Instagram accounts to achieve the greatest reach and impact
